

TTC AGRIS ACTIVATED THE GREEN FUTURE PROJECT

*Joining hands to realize the global Net Zero goal, on December 7, 2023, Thanh Thanh Cong - Bien Hoa Joint Stock Company (TTC AgriS, HOSE: SBT) launched the **"TTC AgriS: 10 Million Trees - Embrace Green Future" Project**. Over 10,000 trees were simultaneously planted by TTC AgriS on the launching day in provinces and cities where the company operates in Vietnam, Laos, and Cambodia.*

"TTC AgriS: 10 Million Trees - Embrace Green Future" - TTC AgriS opens a new chapter in sustainable development commitment

Recently, TTC AgriS implemented the "TTC AgriS: 10 Million Trees - Embrace Green Future" **Project**. This annual campaign is an important part of the activities under the **"Sustainable Development Commitment - AgriS Commitment"** announced by the company since 2023, aiming to pledge the roadmap towards the **Net Zero goal by 2035**.

TTC AgriS's Net Zero 2035 roadmap is a combination of various environmental initiatives on a multinational scale, such as the project to plant 10 million trees, the use of 100% biomass from 2025, combined with a 5% greenhouse gas reduction per year from the Sugar Production, Fertilizer, and Agriculture sectors. Among them, the project to plant 10 million trees was officially launched by TTC AgriS on December 7, 2023, and will be implemented synchronously globally until 2030.

The leadership of TTC AgriS carried out the launching ceremony of the "TTC AgriS: 10 Million Trees - Embrace Green Future" Project

The number of trees will be allocated from 800 thousand to ~2 million trees per year, with **an estimated absorption of over 110,000 tons of CO2 by 2035 and continued accumulation in the future**. TTC AgriS has carefully selected and ensured the suitability of 9 types of trees for the climate and soil conditions in each region, while also providing economic value to the local areas (such as Acacia hybrid, Melaleuca, Eucalyptus, Dalbergia, Dalbergia oliveri, Aquilaria...). The plan to monitor the planting progress and growth journey is also strictly implemented to optimize the CO2 absorption capacity of the trees (including regular tree health checks, reporting growth parameters, on-site image materials...).

Mrs. Huynh Bich Ngoc, Chairlady of TTC AgriS, said: "As a pioneering leading multinational agricultural company, we are aware of the mission to promote ecosystem and environmental balance, especially in the context of Vietnam being one of the countries heavily impacted by climate change. **Through the project of planting 10 million green trees, TTC AgriS is devoted to accompanying the realization of national commitments and implementing a detailed roadmap for greenhouse gas emission reduction towards Net Zero in the entire production value chain by 2035.** At the same time, we aim to convey a strong commitment to sustainable development with the expectation of positive changes from organizations, businesses, and orientations".

In addition to the proactive tree planting activities in August and December each year, throughout the "TTC AgriS: 10 Million Trees - Embrace Green Future" Project, **TTC AgriS will also organize activities to call on partners and customers to spread the spirit of responsibility in accompanying Vietnam towards Net Zero. This will help build a common exchange platform for reputable units and organizations engaged in Corporate Social Responsibility (CSR) activities in Vietnam, as well as collaborate on professional consultation and establish a monitoring framework to assess emission reduction levels.**

Mrs. Huynh Bich Ngoc, Chairlady of TTC AgriS, delivered the opening speech at the Project Launch Ceremony, calling for active and positive participation from the community and relevant stakeholders

Sustainable development, promoting the national agricultural circular economy

Affirming its position as an agricultural enterprise driving green economic development with a journey towards sustainability spanning over half a century, **the "TTC AgriS: 10 Million Trees - Embrace Green Future" Project is a highlight in TTC AgriS's journey to promote ecological balance and strengthen the position of the modern circular national agriculture.**

In fact, the **"green business"** strategy has always been the guiding principle since the early days of operation and has been consistently maintained and promoted by TTC AgriS for over 54 years. Alongside the "TTC AgriS: 10 Million Trees - Embrace Green Future" Project, TTC AgriS has implemented numerous projects in production and business, yielding practical results and actualizing commitments to sustainable development.

With its demonstrated green growth capacity encompassing specialized sustainability themes and "green" financial indicators, **TTC AgriS has continuously received prestigious recognition for its sustainable development and maintaining its position by being included in the VNSI20 Index - the Top 20 stocks with the highest sustainability score in the market - for the 6th consecutive year.**

Leveraging its inherent strengths in the crop value chain, in the period of 2023-2024, TTC AgriS places a focus on the mission of activating natural nutrition through **Nutritional Platform - Traceability Platform - Exchange Platform**, aiming to elevate sustainable agriculture. Concurrently, the company increases investment in research and development to promote circular economic thinking at each stage, sharing knowledge and responsibility with stakeholders, including the reuse of materials, wastewater, and energy storage, reducing consumption in the production process, as well as enhancing organic farming and organic products.

The leadership of TTC AgriS, along with representatives from the local government, planted the first green trees in the "TTC AgriS: 10 Million Trees - Embrace Green Future" Project

With the mission of achieving Net Zero by 2035 and pioneering the leading trends in future agriculture, TTC AgriS confidently asserts its brand in the international market through its "Sustainable Development Commitments - AgriS Commitment"

Underpinned by the "Green" strategy, in the FY 2023-2024, TTC AgriS has strategically oriented and comprehensively established focal tasks related to **solutions, services, smart, and sustainability**. From there, it promotes the application of the **Circular Commercial Value Chain model** with the goal of becoming the provider of high-tech agricultural solutions, participating in the global Food & Beverage value chain, leading the way in anticipating customer needs to enhance the entire product and service ecosystem. Consequently, **TTC AgriS's success will unlock potential markets and achieve a revenue target of VND 60 trillion by 2030. This contributes to economic and social development and shares achievements with all stakeholders.**
