SBT STOCK PRICE INCREASES, Ms. DANG HUYNH UC MY REGISTERS TO BUY 30 MILLION SHARES

A total of 65 million SBT shares was registered to be purchased by 2 Board Members (BOD)

On September 23th, 2019, Ms. Dang Huynh Uc My - Member of the BOD of TTC Bien Hoa (the Company, SBT) registered to buy 30 million SBT shares, expected to be executed by order matching and / or agreement method, from September 27th, 2019 to October 25th, 2019. This is also the time when Ms. Huynh Bich Ngoc, Member of the Board of Directors of SBT is acquiring 35 million shares as previous announcement with the expected trading time from September 17th, 2019 to October 16th, 2019. By the end of August 2019, Ms. My owns 68,394,826 SBT shares, equivalent to 11.66% of equity capital. If successfully purchasing all 30 million registered shares, Ms. My will increase her ownership in SBT to 98,394,826 shares, equivalent to 16.77%. The total number of SBT shares that two members of the Board of Directors expected to buy is 65 million, if calculating the closing price on September 20th, 2019, the expected investment amount reaches VND 1,167 billion. If the transaction is successful, Ms. Ngoc and Ms. My will hold 142,152,764 shares, equivalent to 24% of the Company's equity.

In the context of Vietnam's sugar industry has not had many positive changes due to the cyclical effects, the fact that two members of the Board of Directors invested trillions VND to acquire 65 million shares indicates the absolute confidence in the recent recovery of the Industry with an estimated deficit of about 3.1 million tons in the FY 19-20 , instead of the surplus of 2.6 million tons in the FY 18-19. With nearly 10 years of experience in the Sugar Industry through obstacles, Ms.My has made remarkable achievements by leading the TTC Bien Hoa brand to conquer the 42% market share in Vietnam; compete directly with the leading Sugar Exporters in the world to export TTC Bien Hoa Sugar to 21 countries including the US, Europe, and Singapore, in which have strict requirements on quality standards. In particular, ED & FMAN - one of the three largest sugar trading companies in the world with annual turnover of about US $ 10 billion, has representative offices in 60 countries, also agreed to become a strategic partner of SBT, consuming all Organic Sugar that the Company exported to the European markets after a series of stringent tests on product quality. In addition, the successful mobilization of VND 600 billion from DEG - German Government's investment fund at VND 30,000 / share, 67% higher than the current market price and expected to be disbursed in the last week of September 2019, is also one of the evidences for the belief of pretisge investors in the world with long-term prospect towards this industry.

Given SBT's current market price, this might be considered as a good time for long-term investment because besides the positive prospects of the industry as the world experts have analyzed, SBT also has the advantage of being a pioneer in attracting foreign strategic investors, dominate domestic market share, expand export markets and diversify By-products, even cooperate with giant firms of Asia to develop agricultural product chain. The fact that two members of the Board of Directors bought many shares shows the determination to make a long-term commitment and contribute more deeply to the strategic planning and management activities of SBT in the near future.

SBT shares rebounded, the most important ETF in the market continued to net buy SBT

The investment cash flow has always tended to shift into the leading enterprises in the Industry, with many prospects for growth as well as owning sustainable competitive advantages in the future. SBT shares are still interested by many investors, this is reflected in SBT stock price in recent days, showing signs of recovery and increasing again. As of September 20th, 2019, SBT reached VND 17,950, 14% higher in just one month compared to the bottom price within the latest 12 months of 15,800 on August 14th, 2019. SBT is currently one of the best liquidity stocks in the Sugar Industry when the average volume of shares traded in the latest 3 months reached nearly 2.2 million shares, equivalent to trading value of over VND 38 billion/session; outperforming the peers which the average trading volume was only 150,000 shares, trading value was about VND 4.3 billion, 15 and 9 times lower than SBT.

Price movement and liquidity of SBT in the last 3 months
