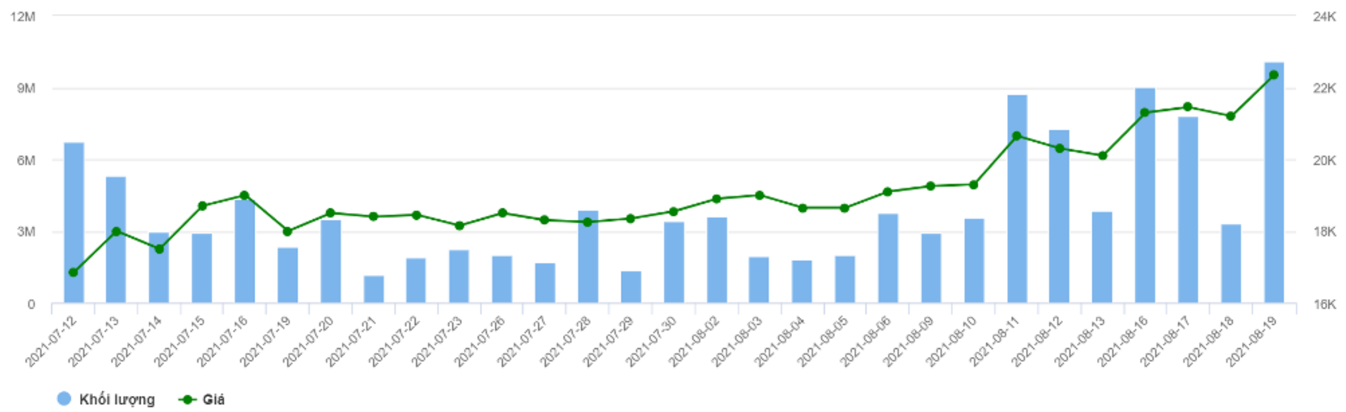
SHARE PRICE OF SBT INCREASES, KEY LEADER REGISTERED TO PURCHASE 6 MILLION SHARES

Ms Doan Vu Uyen Duyen - Chief Operating Officer registered to buy 6 million of SBT shares

On August 24, 2021, **Ms Doan Vu Uyen Duyen – Permanent Chief Operating Officer of Thanh Thanh Cong - Bien Hoa Joint Stock company (SBT, Company) registered to purchase 6 million of SBT shares.** The transaction expects to be executed under order matching trading and/or put-through trading method from August 27, 2021 to September 24, 2021. Up to August 23, 2021, Ms Duyen owns 929,425 SBT shares, equivalent to 0.15% of equity capital. If successfully purchasing all 6 million registered shares, Ms Duyen will increase her ownership at SBT to 6,929,425 shares, equivalent to 1.08%. The expected investment amount reaches nearly VND 126 billion (estimated based on the closing price of VND 21,000 on August 23, 2021).

Ms. Doan Vu Uyen Duyen used to hold the position of Chief Finance Officer at SBT since September 2018 and was appointed to the position of Permanent Chief Operating Officer from February 2020. During this time, she restructured the finance operation of the company as well as succeeded in raising funds from domestic and foreign financial institutions. In addition, she made several essential decisions in building a sustainable governance system from the information technology system – Oracle Cloud ERP, management process and developed assessment framework as well as vigorous finance structure based on the foundation of risk management, prepared SBT to enter the global market. Her registered purchase of 6 million of SBT shares indicates her solid belief in the strategic direction and governance policy of SBT.

SBT's share price rebounced in the context of many supportive factors



Prices movement and Liquidity of SBT in the most recent months. Source: Vietstock

Regarding the general situation of the sugar industry, along with Company's good intrinsic values, SBT's share price recently showed signs of recovering and continuing to grow. As of August 19, 2021, SBT's share price reached 22,350, increased over 33% within just 1 month.

SBT is currently one of the most liquid stocks in the sugar industry with the most recent monthly average trading volume of nearly 3.9 million shares, equivalent to a trading value of VND 78 billion/ session, excelling other stocks in the same industry.

Given SBT's current market price, the key leader reckons this is the perfect timing for long-term investment because besides the positive prospects of the industry as the world experts have analyzed, SBT also has the competitive advantage of being the pioneer in attracting foreign strategic investors, dominating the domestic market share, expanding the export markets and diversifying By-products, even cooperating with well-known brands in the world to develop the chain of agricultural products. The Board of Management purchased shares has shown the determination to make a long-term commitment and contribute more deeply to the strategies as well as the governance activities of SBT in the future.

In the fiscal year 2020-2021, SBT successfully sold 1.16 million tons of Sugar, increased 10% compared to the same period last year, which was the second consecutive year that the consumption volume reached over 1 million tons. Net revenue was VND 14,902 billion, up 16% compared with the corresponding period last year and reached 104% of the year plan. Profit before tax recorded VND 789 billion, accelerated 56% over the same period last year and outperformed more than 120% of the plan. Profit after tax was VND 675 billion, increased by 86% over the same period.

The price of Raw Sugar is reaching the highest level in the past 4 years and the uptrend is predicted to continue, closing the session on August 17, 2021 with a strong increase of 103% to 20.3 UScent/lb. The main reason is that Brazil – a country that provides approximately 40% of the world sugar production, might end the crop much earlier than usual due to harsh forests in the Central-South Region of Brazil, results in the limited global supply. Other causes also come from the recovery of the oil price, the rapid increased stockpiling demand of countries and the speculation of commodities.
