#### 3.5 Leased assets

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

*Where the Group is the lessee*

Assets held under finance leases are capitalised in the consolidated balance sheet at the inception of the lease at the fair value of the leased assets or, if lower, at the net present value of the minimum lease payments. The principal amount included in future lease payments under finance leases are recorded as a liability. The interest amounts included in lease payments are charged to the consolidated income statement over the lease term to achieve a constant rate on interest on the remaining balance of the finance lease liability.

Capitalised financial leased assets are depreciated using straight-line basis over the shorter of the estimated useful lives of the asset and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

*Where the Group is the lessor*

Assets subject to operating leases are included as the Group's fixed assets in the consolidated balance sheet. Initial direct costs incurred in negotiating an operating lease are recognised in the consolidated income statement as incurred.

Lease income is recognised in the consolidated income statement on a straight-line basis over the lease term.

*Land use rights*

Land use right is recorded as intangible fixed asset on the consolidated balance sheet when the Company obtained the land use right certificate. The costs of a land use right comprise all directly attributable costs of bringing the land lot to the condition available for its intended use.

The advance payment for land rental, of which the land lease contracts have effectiveness prior to 2003 and Land use right certificate being issued, are recorded as intangible fixed asset according to Circular No. 45/2013/TT-BTC issued by the Ministry of Finance on 25 April 2013 guiding the management, use and depreciation of fixed assets ("Circular 45").

#### 3.8 Investment properties

Investment properties are stated at cost including transaction costs less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognized is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Group.

Depreciation and amortisation of investment properties are calculated on a straight-line basis over the estimated useful life of each asset as follows:

|                          |               |
|--------------------------|---------------|
| Buildings and structures | 20 - 25 years |
| Land use rights          | 50 years      |

Investment properties are derecognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment. The consolidated income statement reflects the share of the post-acquisition results of operation of the associates.

The share of post-acquisition profit (loss) of the associates is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividends received or receivable from associates reduce the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

The prepaid land rental represents the unamortised balance of advance payment made in accordance with the lease contract signed with farmers for a period of 44-50 years. Such prepaid rental is recognised as a long-term prepaid expense for allocation to the income statement over the remaining lease period according to Circular 45.

### **3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### **3.11 Business combinations and goodwill**

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortization. Goodwill is amortized over 10-year period on a straight-line basis [amend as appropriate]. The parent company conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

No new goodwill is recorded as for a business combination involving entities under common control, which is a business combination in which all of the combining entities are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. An entity may be controlled by an individual or by a group of individuals acting together under a contractual arrangement. The difference between the acquirer's cost of investment and the acquiree's net assets is presented as a separate reserve within equity section and recognised in "Other fund's belonging to owner's equity" in the consolidated balance sheet.

Business combinations involving entities under common control are accounted for as follows:

- ▶ The assets and liabilities of the combined entities are consolidated at their carrying amounts on the date of business combination;
- ▶ No goodwill is recognised as a result of the business combination;
- ▶ The consolidated income statement reflects the results of the combined entities for the full year, irrespective of when the combination took place.

#### **3.12 Borrowing costs**

- ▶ Monetary liabilities are translated at selling exchange rate of the commercial bank where the Group conducts transactions regularly.

All foreign exchange differences incurred are taken to the consolidated income statement.

#### *Conversion of the financial statements of foreign operation*

For the purpose of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operation are translated into VND using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the year, unless exchange rates fluctuated significantly during that year, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in the "foreign exchange difference reserve" account in the equity section of the consolidated balance sheet (attributed to non-controlling interests as appropriate).

#### 3.15 Convertible bond

Bonds that are convertible by the holder into a fixed number of ordinary shares of the entity are separated into financial liability (a contractual arrangement to deliver cash or other financial assets) and equity instrument (a call option granting the holder the right, for a specified period of time) based on the terms of the contract.

On issuance of the convertible bond, the fair value of the liability component is determined by discounting the future payment (including principal and interest) to present value at the market rate for an equivalent non-convertible bond less issuance cost.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in shareholders' equity. The carrying amount of the conversion option is not re-measured in subsequent years.

Transaction costs are amortised during the lifetime of the bond. At initial recognition, issuance costs are deducted from the liability component of the bond.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.21 Taxation (continued)

##### *Deferred tax (continued)*

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or when the Group intends either settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Geographical segment of the Group is in Vietnam only.
